Dr. Raghu D K possesses 23 years of experience in gastroenterology.

7. Who is a gastroenterologist?

A gastroenterologist is a medical specialist who diagnoses and treats diseases of the gastrointestinal tract and liver. Gastroenterology is a branch of medicine focusing on disorders affecting the entire digestive system, from the mouth to the anus. This includes conditions of the esophagus, stomach, small intestine, large intestine, rectum, and liver.

8. Which body parts' disorders does a gastroenterologist treat?

A gastroenterologist treats disorders of the digestive system, including the stomach, liver, esophagus, small intestine, colon, rectum, pancreas, gallbladder, and bile ducts.

9. Can a Gastroenterologist Perform a Colonoscopy?

Yes, gastroenterologists perform colonoscopies. Their specialized training in gastrointestinal diseases includes this procedure.

10. Is endoscopy a safe procedure?

Endoscopy is generally a safe medical procedure. However, like any medical intervention, there is a small risk of complications, most notably bleeding. This risk is slightly higher when a biopsy is performed or when treatment for digestive diseases is involved during the endoscopy.
