## Frequently Asked Questions

### 1. Where does Dr. Rahul Lath practice?

Dr. Rahul Lath's medical practice is located at Apollo Health City, Jubilee Hills. This hospital offers comprehensive healthcare services.

## **2. Who is Dr. Rahul Lath?**

Dr Rahul Lath is a renowned Neurosurgeon with over 20 years of experience. He practices in Hyderabad at Apollo Health City Jubilee Hills. Dr Rahul Lath holds a degree in MBBS, MCh (Neurosurgery),DNB(Neurosurgery). He provides treatments including Skull Treatment, Trigeminal Neuralgia Treatment. He specializes in treating conditions like , Craniosynostosis, Epilepsy.

## **3. Why do patients visit Dr. Rahul Lath?**

Patients choose Dr. Rahul Lath for specialized neurosurgical procedures including Gamma-Knife Radiosurgery, Laminectomy, and Deep Brain Stimulation.

## **4. What is Dr. Rahul Lath's specialization?**

Dr Rahul Lath specializes in Neurosurgery. He has expertise in treating conditions such as , Craniosynostosis, Epilepsy. His key treatments include Skull Treatment, Trigeminal Neuralgia Treatment.

## **5. What are Dr. Rahul Lath's medical qualifications?**

Dr Rahul Lath holds MBBS, MCh (Neurosurgery),DNB(Neurosurgery), reflecting his comprehensive education in the field of Neurosurgery.

## **6. How many years of experience does Dr. Rahul Lath have?**

Dr. Rahul Lath has 31 years of experience in Neurosurgery. His professional history details are available upon request.

## **7. Who is a neurosurgeon?**

A neurosurgeon is a physician specializing in the diagnosis and surgical treatment of neurological disorders affecting the brain, spinal cord, and peripheral nerves. They manage a wide spectrum of conditions requiring neurosurgical expertise.

## **8. Can a neurosurgeon remove brain tumors?**

Yes, neurosurgeons perform brain tumor removal surgery, a procedure known as craniotomy. This involves a surgical incision to access and remove the tumor.

## **9. Does a neurosurgeon only perform surgery?**

While neurosurgeons are highly skilled in complex brain and spine surgeries, they prioritize conservative treatments. Medication is the preferred initial approach. Surgical intervention is only considered when medical management proves ineffective in providing relief.

## **10. Which diseases necessitate a neurosurgeon consultation?**

Consult a neurosurgeon for conditions such as birth defects, traumatic brain or spinal injuries, brain tumors, vascular disorders, brain or spinal infections, stroke, and degenerative spinal diseases like multiple sclerosis. Neurological symptoms should prompt a consultation with a specialist.
