Overview

Dr Shrikant Lagvankar is an eminent neurosurgeon at Apollo Hospitals Mumbai with extensive experience in managing brain and spinal disorders. With qualifications including MBBS, MS (General Surgery), and MCh in Neurosurgery, he excels in treating tumors, vascular malformations, traumatic brain injuries, spinal cord injuries, and congenital neurological abnormalities. He applies state-of-the-art techniques such as microsurgery, neuronavigation, and minimally invasive spinal surgery to improve patient recovery and neurological function. Dr Lagvankar's comprehensive treatment approach includes preoperative planning, precise surgical intervention, and postoperative rehabilitation. Fluent in English, Marathi, and Hindi, he prioritizes patient education and empathetic communication, aiming to optimize neurological outcomes and patient satisfaction, supported by his active involvement in neuro-research and teaching.
